INDEX TO ILLUSTRATIONS

Altair and Comet Pons-Winnecke, Spectra of..... 5
American Association of Variable Star Observers, Cambridge, Massachusetts, October 22, 1927, Plate I and key .....Op. 57
American Astronomical Society, New Haven, December, 1927, Plate VI with key .....Op. 139
Amherst, September, 1928, Plate XXII with key .....Op. 534
Aphelia of comets of short period 418, 421
Astronomische Gesellschaft, Opening meeting of the, Heidelberg, 1928..... 523
Twenty-eighth session of the, Plates XX, XXI, with key .....Op. 526, 527
Aurorae of March 28-29, 1928, Composite sketch of..... 327
13 Ceti, Curves of recession 472
Absolute orbit of 471
Comet 1927 *d* (drawing) 321
j according to Berkeley elements, Orbit of 203
(Schwassman-Wachmann), Orbit of 120
k (Skjellerup) as drawn by G. Van Biesbroeck, Plate A.....Op. 1
Encke 119
Pons-Winnecke, Spectra of Altair and 5
Skjellerup-Maristany (diagram) 286, 287
Comets of short period, Aphelia of the 280
Constellation chart 48, 115, 186, 244, 305, 545, 606
Corona as photographed at Jokkmokk, Lapland, June 29, 1927, Plates III, IV .....Op. 75
Coudé of the Observatory at Nice, Equatorial 169
Eclipse of June 29, 1927, Plates III, IV .....Op. 75
May 19, 1928, Total, (diagram) 40
November 12, 1928, Partial, (diagram) 41
June 3, 1928, Total lunar (diagram) 288
Contacts of Lunar, Nov. 27, 1928 536
Epsilon Aurigae, Light curves 570
Eros and Mars, The orbits of 242
Godfrey, Charles Cartlidge 221
Group at Garden Party in "Hortus Botanicus," Leiden, July 10, 1928..... 517
Harvard Astronomical Laboratory, Lecture room 592
Horoscope of Robert Burton, The, Plate II .....Op. 9
International Astronomical Union—
at "Meerrust," Warmond, Holland, July 7, 1928, Plate XIX.....Op. 518
Executive Committee of, 1928 514
Leiden, Holland, July 5-13, 1928, Plates XVII, XVIII .....Op. 511
Kepler monument in Weil der Stadt, Germany 527
Lunar eclipse of June 3, 1928, Total, (diagram) 288
Mars, Drawings of, Plates XII, XIII .....Op. 449
Plates XIV, XV .....Op. 457
Mercury and Earth, Orbits of, seen from southern side of the ecliptic..... 341
Meteor, A remarkable, photographed at Mukden, Manchuria, *Issei Yamamoto*, Plate XVI .....Op. 496

Meteoric procession of 1913 February 9, Chart of 399
Museum of natural and technical sciences, at Munich 172
Neptune perturbed by planet *O*, Orbit of 150, 151
Niuafóu Island, As an eclipse station 460, 461
Nova, Star chart for Schwassmann and Wachmann's 51
Observatory, A new astronomical 468
at Columbia University, Plates IX, X .....Op. 333
Views of an amateur's 408, 410
The Williams 447
Occultation charts 425, 426
of Sigma Sagittarii, immersion and emersion 166, 362
Orbits of the planets 12, 13
Payne, William Wallace, Plate VIII .....Op. 267
Planet *O*, Correction for longitude of 159
Elliptical orbit of 161
Planets, Apparent paths of, among the stars in 1928 (diagram).....43, 44
Longitudes of the outer 154
Orbits of the 12, 13
Photoelectric photometer of the Illinois Observatory, The, Plate V .....Op. 90
Refractor at Vienna, Dome of 27-inch 177
Satellites, Apparent orbits of, at date of opposition (diagrams) 45, 46
Saturn perturbed by *O*, Orbit of 156
Spectra of Comet Pons-Winnecke and Altair 5
Spectroscopic binary 31 Crateris, Velocity curve of 413, 414
Stadsgehoorsaal, The, Leiden, Holland 513
Sun, and spots, photographed July 10 502
Dial constructed by H. B. Curtis and Clarence E. Baer, Two views of, Plate VII .....Op. 211
Diagram of 212
Photograph of, September 25, 1928, Plate XXIII.....Op. 569
Sun's spotted area, The 542
Telescope, The 30-inch reflecting, of the University of Illinois Observatory.. 87
Urania, a school of science for the people of Vienna 175
Uranus, Perturbations of 356, 358
perturbed by Neptune, Orbit of 143, 146, 147
O 152
Van Biesbroeck, G., Drawing by, of Comet 1927 *k* (Skjellerup), Plate A..Op. 1
Variable BF Ophiuchi 351
Venus in the heavens in 1927, Path of 342
Very, Frank Washington, Plate XI .....Op. 391
Villa Berg, Stuttgart, Germany 528
Wolf, Professor Max 522
Zodiacal Light, The 566

GENERAL INDEX

Adams, Walter S., and *Henry Norris Russell*, A new method of determining temperatures and pressures in stellar atmospheres (abstract) 294
Henry Norris Russell, and *Charlotte E. Moore*, A calibration of Rowland's intensity scale for solar lines (abstract) 295
Alden, Harold L., Alpha and Proxima Centauri (abstract) 596
Allen, Leah B., Comment on injuries from meteorites 505
Alpha and Proxima Centauri, *Harold L. Alden* (abstract) 596
Alter, Dinsmore, The teaching of astronomy (fifth paper) 270
American Astronomical Society—
Announcement of the fortieth meeting 381
Reports of observatories, 1926-1927, (Dudley, Goodsell, Kodak Research Laboratories, La Plata, Leander McCormick, Lick, Lowell, Michigan, Mount Wilson) 20-39
Reports of observatories, 1926-1927, (Harvard College, United States Naval, Perkins, Princeton, Smithsonian, Sproul, Tacubaya, Van Vleck, Washburn, Yale University) 95-114
Reports of observatories, 1926-1927, (Yerkes) 180-185
Thirty-ninth meeting of the 139, 229, 290, 344
Fortieth meeting of the 533, 596
Forty-first meeting 623
Andrews, L. B., and *H. T. Stetson*, On the distribution of light in the solar corona of 1926 (abstract) 344
Apex and galactic coördinates for any star, *J. A. Pearce* and *S. N. Hill*..... 293
Asteroids discovered 366
Astronomer, Junior, and junior mathematician 263
Astronomers' Association, Amateur 71
Astronomical fraternity of the world, The, *David B. Pickering*, Part V 167
productivity, *Samuel G. Barton* 622
society of 1854, The Cambridge, *Solon I. Bailey* 226
Astronomische Gesellschaft at Heidelberg, The, *Curvin H. Gingrich* 521
Astronomy as a church enterprise 137
at Harvard University, Graduate courses in 263
in High School, Elementary 323
The teaching of (third paper), *William F. Meyer* 1
(fourth paper), *Harriet W. Bigelow* 215
(fifth paper), *Dinsmore Alter* 270
Aurora, of March 28, 1928, The, *H. T. Stetson* 327
Aurora, Observations of, at the Detroit Observatory 499
Dallas, Texas 502
Ft. Worth, Texas 502
Indianapolis, Indiana 503
Ogden, Utah 563
Bailey, Solon I., The Cambridge astronomical society of 1854 227
Baker, Robert H., Telescope and photometer of the University of Illinois Observatory 86
Balmer, Harold F., Phenomena for 1928 40

Balmer lines in A stars, Photometry of, *Emma T. R. Williams* 352
Bands between Hγ and Hδ in the spectra of early type stars, *Laura Hill McLaughlin* (abstract) 601
Barnard, Edward Emerson, Commemoration, *John T. McGill* 336
Barnard, R. J. A., Naked-eye visibility of Mercury and Venus 340
Barton, Samuel G., Astronomical productivity 622
Bicentenary of the death of Sir Isaac Newton, *Frederick E. Brasch*.....14, 78
Bigelow, Harriet W., The teaching of astronomy (fourth paper) 215
Birkhoff, G. D., Newton's philosophy of gravitation 18
Bobrovnikoff, N. T., and *A. Pogo*, Spectrum of Comet 1927 *c* 4
Book Reviews—
A Guide to the Constellations 387
Amateur Telescope Making 626
An Experiment with Time 388
Outline of Stellar Astronomy 331
Astronomy and Cosmogony 625

Brasch, Frederick E., Bicentenary of the death of Sir Isaac Newton.....14, 78

Brasch, Frederick E., John Winthrop, America's first astronomer and the first disciple of Sir Isaac Newton in the Colonies... 83
Brett, George S., Newton's Place in the history of religious thought 82
Bright lines, On the stars whose spectra have, *B. P. Gerasimovič* 232
stars, Photovisual magnitudes and color indices of, *Edward S. King* (abstract) 600
British Astronomical Association, The 624
Brown, E. W., Application of the Hollerith calculating machine to the lunar tables (abstract) 596
Developments following from Newton's work 80
Occultations: a report of progress 282
Results of observations of the moon in 1926 (abstract)..... 229
Bunch, Sterling, Beyond the stars (poem) 217
Burland, M. S., and *F. Henroteau*, Geophysical method for determining the hour angle of a star for a given altitude (abstract) 599
Burton's horoscope and the date of his birth, *Florian Cajori* 9
Cajori, Florian, Burton's horoscope and the date of his birth 9
Newton's twenty years' delay in announcing the Law of Gravitation 80
Calculating machine, Application of the Hollerith, to the lunar tables, *E. W. Brown* (abstract) 596
Calendar, The reform of the 206
Campbell, Leon, and *Annie J. Cannon*, Preliminary Discussion of the Harvard catalogue of long period variables (abstract)..... 597
Monthly report of the American Association of Variable Star Observers during 1928 .....
.....55, 124, 192, 249, 310, 370, 432, 478, 547, 607
Campbell, W. W., Newton's influence upon the development of astrophysics.. 19
Cannon, Annie J., and *Leon Campbell*, Preliminary discussion of the Harvard catalogue of long period variables (abstract)..... 597
Changes in the spectra of variable stars of long period (abstract) 229
13 Ceti as a variable star, *Alexander Pogo* 470
Chile Station of the Lick Observatory, Sale of 499
Chromosphere, Solar, Structure of the, *Donald H. Menzel* (abstract) 602
Clocks, The Shortt 567
Comet 1916 I (Taylor) 547, 621
1926 *f* (Comas Solá) 70, 201
1927 *c* (Pons-Winnecke) 120
Spectrum of, *N. T. Bobrovnikoff* and *A. Pogo* 4
d (Stearns) 69, 120, 201, 260, 321, 621
g (Schaumasse) 70, 120, 201
h (Encke) 69, 118, 201
j (Schwassmann-Wachmann) 69, 119, 202, 260, 621
k (Skjellerup) 67, 117, 201, 240, 260, 284, 300, 346
1928 *a* (Reinmuth) 200, 259, 260, 322, 379, 444
b (Giacobini) 320
c (Forbes) 624

Comet Skjellerup-Maristany, Concerning the identification of, *Maud W. Makemson* 284
discovered anew 135
notes, G. Van Biesbroeck 67, 117, 200, 259, 320, 379, 444. 506, 546. 621
Comets of short period, The orbits of the, *William H. Pickering* 274
Computing, A device for, the components of the earth's orbital velocity to points on the sun, *Ralph E. De Lury* (abstract) 597
Comrie, L. J., The total solar eclipse of 1932 August 31 (abstract) 230
Corona of 1926, On the distribution of light in the solar, *H. T. Stetson* and *L. B. Andrews* 344
Correction, A 209, 564
Curtis, H. B., The sun dial and its construction 211
Curtiss, R. H., The spectral type of Procyon 576
Dark lines in stellar spectra, A theory of the production of, *John Q. Stewart* 345
De Lury, Ralph E., A device for computing the components of the earth's orbital velocity to points on the sun (abstract)..... 597
Proposed form of spectroheliograph for small areas (abstract) 598
Sunspots and animals (abstract) 231
Detroit observatory, Photometry at the, *Dean B. McLaughlin* (abstract)..... 600
Double stars E 259 and E 1031, Note on the, *Alexander Vyssotsky* 349
measured by interference method 385
Douglas, A. Vibert, and *F. Henroteau*, A study of Eta Aquilae (abstract).. 599
Doyle, William C., Occultations for August and September..... 424
The occultation of Sigma Sagittarii, 1928, April 12 165
July 2 361
Total lunar eclipse June 3, 1928 288
